

I am a seasoned Full Stack Engineer with 8+ years of experience, specialising in Java, React, and AWS. Currently, I am the Co-Founder and sole developer of YotPoint (yotpoint.com), a marketplace platform for super yacht services, where I am responsible for the full development lifecycle, including architecture, frontend, backend, and cloud infrastructure. With a strong track record of delivering complex projects independently, I have the ability to manage workloads autonomously while communicating effectively with non-technical stakeholders.

Between January 2023 and June 2024, I traveled the world, completed a Product Building Course with Barclays Eagle Labs, and further refined my skills, preparing to launch my own business.

Experience:

YotPoint - CoFounder & Sole Developer

06/2024 - Present

- Built and currently maintain a marketplace platform for super yacht services using **Next.js**, **Vercel**, and **Tailwind CSS**.
- Designed and managed AWS infrastructure (EC2, RDS, CloudWatch) to ensure platform scalability and performance.
- Collaborated with stakeholders to gather requirements and prioritise feature development.
- Integrating AI-driven communication workflows with Twilio.

Glofox - Product Engineer

04/2020 - 12/2022

- Resolved over 50 P1 bugs and 250 issues during the COVID-19 pandemic for a global SaaS gym management platform.
- Led the design and development of new features and greenfield services using **React**, **Node.js**, and AWS to transition from a legacy monolith.
- Collaborated cross-functionally to enhance the product's user experience and meet the demands of a shifting industry landscape.
- Mentored Junior members of the team and led planning and Kanban/scrum system meetings

CGI - Technical Consultant

09/2018 - 03/2020

- Modernised critical government infrastructure systems using **Spring Boot**, **Hibernate**, and AWS services like **S3** and **CloudFront**.
- Built internal member management tools and REST APIs.
- Completed Scrum Master Certification and AWS Developer training.

Gamesys Ltd - Software Engineer

08/2015 - 08/2018

- Developed real-time event pipelines and integrated payment provider APIs using **Java**, **Docker** and **Spring**.
- Built and optimised a data pipeline using **Google Cloud Platform (GCP)** and **BigQuery**, improving internal reporting processes.

Sick Cover Ltd - Product Owner

10/2015 - 07/2017

- Managed product backlog and wrote user stories for a startup app.

Education:

MBA Essentials - London School of Economics (LSE)

09/2024 - Present

Product Building Course - Barclays Eagle Labs

03/2024-04/2024

BSc in Computer Science and Mathematics - Royal Holloway, University of London - 2:1

2012 - 2015

Technical Skills:

- **Frontend:** React, Redux, Tailwind CSS, JavaScript, TypeScript
- **Backend:** Java, Spring Boot, RESTful APIs, CQRS, Docker
- **Cloud:** AWS (EC2, RDS, Lambda, CloudWatch), GCP (BigQuery, Dataflow)
- **CI/CD:** CircleCI, GitHub Actions
- **Database:** PostgreSQL, MongoDB, MySQL, Hibernate
